

Simple Instructions
to
Install the Dealer Desktop Updater

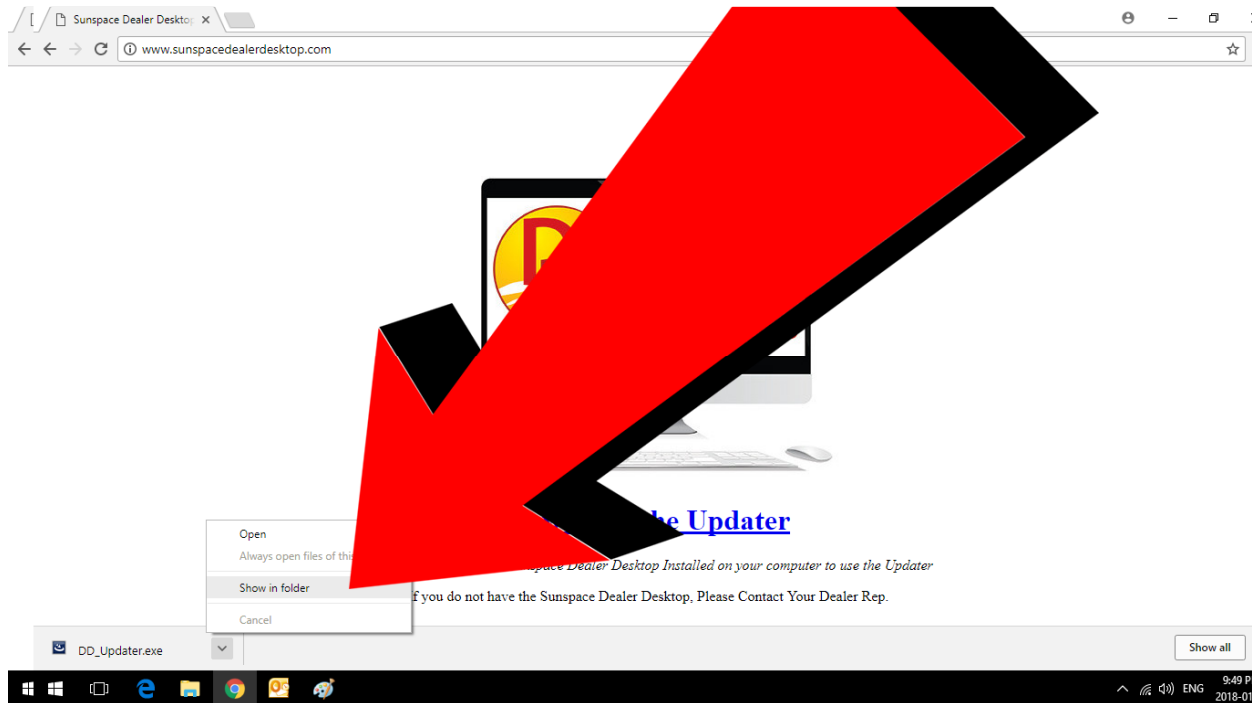

First step is to Download the Installation File from
www.sunspacedealerdesktop.com

To download the file, click the link that reads
Download the Updater

******* IMPORTANT *******

You **MUST run the Setup File as an Administrator**

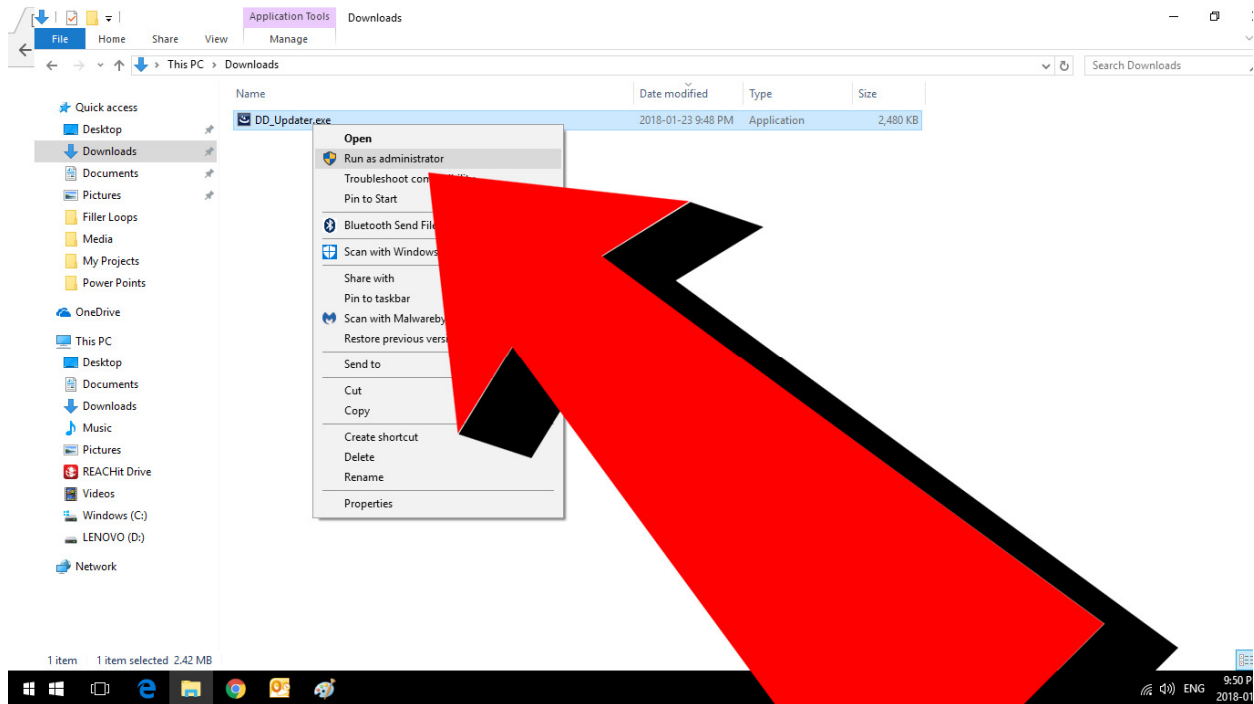

To do this, we must First Locate the File.

Using Chrome, You can Click the cheveron and select **Show In Folder.**

Otherwise you may need to navigate to your **Downloads Folder**

Right -Click on DD_Updater.exe and select **Run as Administrator.**

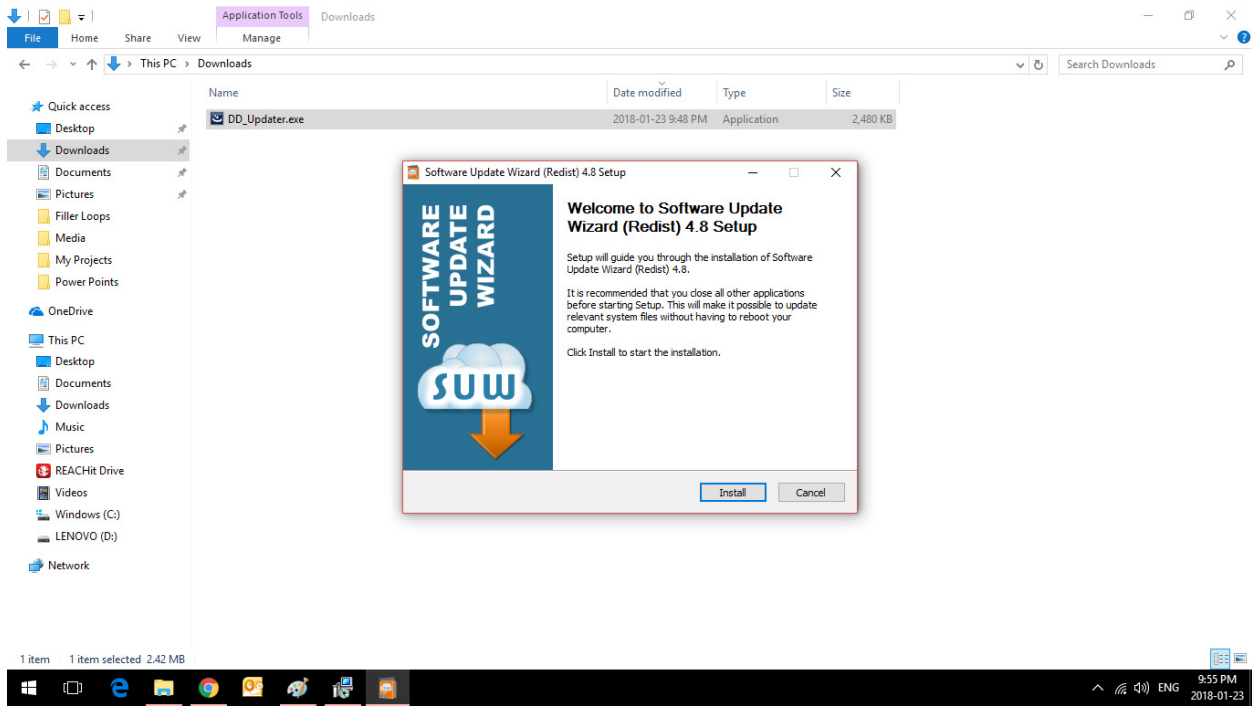

Windows User Account Control may ask you if you want to allow an unpublished app to make changes to your system - Answer **YES**

*** note: there is no screen shot for this dialog**

The installation will now begin, press **Next**

Once you click **Finish, another piece of software will be installed to perform the update. Press **Install**.**

Press **Close when the installer finishes.**
Now it may seem like nothing is happening
And then this Happy Screen will Appear.
